

ASSIGNMENT NO.:09

Title

Design XML schema and write XQUERY to display the data

Aim:

Study XML Query usage and write XQUERY to display the data XQuery FLOWR expression

Objective

To study and use XML Query using XQuery FLOWR expression

Theory:

Explain following points

- Explain -What is XML, XML document
- Explain Components of XML
- Explain Need for XML databases, example XML database applications
- Explain XQUERY
- Explain of FLOWR

Syntax(explain syntax in detail), Example

Input:

XML data (either from website or by directly giving local XML file)

Output:

Data as per request

Platform:

Conclusion: Thus, we have learned creating and using XML Document and XQuery

FAQs:

1. Enlist Advantages of XML over HTML ?
2. How XML is used to handle data?
3. Enlist applications of XQuery.
