Assignment No: 6

Assignment Title: Key Exchange

Aim: Write a program using JAVA or Python or C++ to implement Diffie-Hellman Key
     Exchange Algorithm

Objectives: To learn how to distribute the key

Theory:

   Explain Diffie-Hellman algorithm with example.

Programming Language used: C++/Java/Python

Conclusion:

FAQs:

  1. What are other key exchange protocols, other than DH algorithm?
  2. Explain the different types of keys.
  3. Explain different key management issues.
